Authentication using User Behavioral Gestures

TACTACTAC

MEMBER: WONG MAN FAI , CHAN WING SZE

THEME: CYBERSECURITY

Background

- requirements for passwords

- alternative of numeric password

Is that really safe?

Face ID?

Touch ID?

PIN ID?

Problem

- face Id is not strong enough for the security

- easy to steal your password by digital footprint

Solution – MyTotem

Create an authentication scheme based on ….

- user behavioral gestures

- bodily motion + acceleration + gesture speed

- face recognition + user behavioral gesture recognition
